Changes to TRIP Fellowships scheme for 2016

- **In RGMS B-EI: Eligibility Information**: The Health Care Profession sub-heading has been removed.
- **In RGMS B-RTO: Research Translation Output**: Applicants can now highlight the number of citations for their most significant publications that demonstrate the quality of their research translation output in this section.
- **Qualifications and Employment** – TRIP Fellows may not be enrolled in Masters or PhD studies while undertaking their Fellowship. And must not have previously held an NHMRC Research or Practitioner Fellowship.
- **The Translation Project** – Wording has been revised to clarify that the applicant must lead and be directly involved in the project work.
- **Assessment Process** - Applicant interviews are no longer part of the TRIP Fellowship assessment process. In place of applicant interviews, the panel will meet via video conference to discuss applications.
- **Attachment A** - TRIP Fellowship Category Descriptors have been revised to more accurately differentiate the descriptions in the lower scores from the higher scores.

For the full list of changes to TRIP Fellowships, please refer to TRIP Fellowship Advice and Instructions and Section 2 of the TRIP Fellowships Funding Rules for funding commencing in 2017.

In addition to the changes listed above, for the current application round applicants should be aware of the following changes to TRIP Fellowships CV requirements:

- **CV-RO Relative to Opportunity** If applicable, applicants may highlight any ‘Relative to Opportunity’ considerations for the last five years.
- **CV-TPCO: Therapeutic Products and Commercial Outcomes** Applicants may provide details of any therapeutic products or commercial outcomes for which they contributed significantly to the development effort.
- **CV-RD: Research Data** Applicants may provide details of any research datasets that they have collected or created for their research
- **CV-RT: Research Tools** Applicants may provide details of any research tools (e.g. new or improved techniques, instruments, procedures) for which they contributed significantly to the development effort.
