Dr Alessandro Antonello  
School of Historical and Philosophical Studies  
The contemporary history of the Southern Ocean: The challenges of marine conservation, ocean science and international order, 1950s to present.

Dr Kathleen Birrell  
Melbourne Law School  
Counter narratives: Climate change law and Indigenous rights.

Dr Sebastian Duchene  
Department of Biochemistry and Molecular Biology  
Modelling infectious disease evolutionary dynamics using whole-genome sequence data.

Dr Kim Dunphy  
Melbourne Conservatorium of Music  
Scoping and systematising outcomes of dance movement therapy interventions across population groups and contexts.

Dr Farhad Farokhi  
Department of Electrical and Electronic Engineering  
Crowd-sourcing in estimation and control of large-scale systems.

Dr Nicholas Golding  
School of BioSciences  
Uniting predictive models for ecological and epidemiological mapping.
Dr Ligia Lopez Lopez

*Melbourne Graduate School of Education*

Popular visual culture and diversity: Researching with children to envision curriculum for more equitable societies.

Dr Amy Prendergast

*School of Geography*

The role of climate change in the expansion of early modern human populations and the demise of Neanderthals.

Dr Saied Shafa

*Department of Business Administration*

The influence of cultural diversity on trust formation, stress regulation and organisational behaviour.

Dr Michael Whitehead

*School of BioSciences*

Plant diversity and adaptation in a changing world: The effects of animal pollinators.
